DEVOPS FROM
ZERO TO **HERO**

SECTION 3

PREREQUISITE FOR LEARNING DEVOPS

1. A Computer (Basic Requirement)

- At least 4GB RAM (8GB is better)
- Windows, macOS, or Linux
- Stable internet connection

2. Operating System (OS)

- Linux (Best choice) – Ubuntu is highly recommended
- macOS – Also good (already Unix-based)
- Windows – Windows Subsystem for Linux (WSL)

3. Terminal

- Linux → Terminal is already installed
- macOS → Terminal is already installed
- Windows → You need to install:
- Windows Terminal
- WSL (Ubuntu)

4. Code Editor

- Visual Studio Code (VS Code)

5. Version Control Tool

- Git

6. GitHub Account

7. Basic Browser
